

Amendments to the Claims

1. (Previously Presented) A power transmission fluid composition which comprises:
 - (a) a major amount of an oil of lubricating viscosity;
 - (b) an effective amount of a power transmission fluid performance additive package; and
 - (c) a static friction reducing amount of a member selected from the group consisting of the reaction products of maleic or succinic acid or anhydride or a C₁-C₆ alkyl substituted maleic or succinic acid or anhydride with a primary aliphatic amine of the formula R-NH₂ wherein R is a C₄-C₃₀ hydrocarbyl group which does not contain a primary amine.
2. (Original) The composition of claim 1 wherein the product is derived from a maleic acid or anhydride.
3. (Original) The composition of claim 1 wherein R is a C₁₂-C₂₂ alkyl.
4. (Original) The composition of claim 1 wherein the static friction reducing amount is present in an amount ranging from 0.01 to 10 wt. %.
5. (Original) The composition of claim 1 wherein the amine is octadecyl amine.
6. (Original) The composition of claim 1 wherein the imide is formed from maleic anhydride or methyl succinic anhydride.
7. (Original) A power transmission device containing the composition of claim 1.
8. (Original) An automatic transmission apparatus containing the composition of claim 1.
